

## Manage & automate your cloud operations like an expert

Realizing the full potential of the cloud in a digital transformation is difficult.  
Traditional IT operating models, tools and skills are no longer expedient.  
Cloud services and APIs to run and operate cloud applications are overwhelming.  
Specialist knowledge and scripting skills are required, but scarce and expensive.  
Migrating and deploying infrastructure and applications is only Day1...

It is time to simplify how you...

MontyCloud's DAY2™ has helped us achieve automated provisioning and enabled intelligent operations of AWS resources and applications that power our research team. It is always a challenge to work on cutting edge research areas with limited cloud IT specialists and budget. Thanks to MontyCloud, we have reclaimed over 30% of our productive time and we are able to focus more on our research and innovations.

**Jasmin Patel**, Assistant Vice President,  
Research Strategy & Innovation, St. Louis University

## MontyCloud DAY2™

No-Code intelligent cloud ops for Well-Managed Cloud, Servers and Applications

**DAY2™ Discovery & Classification**  
Gain continuous and complete visibility into your cloud environments across cloud regions and cloud account boundaries

**DAY2™ Well-Managed Cloud**  
Optimize cloud environments on demand and instantly automate day 2 operations

**DAY2™ Well-Managed Servers**  
Deliver autonomous management, and continuous compliance enforcement across on-premise and cloud servers

**DAY2™ Well-Managed Applications**  
Deploy compliant application environments on-demand and instantly automate day 2 operations

## PLANS & FEATURES

PACKAGES	DAY2™ Discovery & Classification [FREE]	DAY2™ WELL-MANAGED CLOUD	DAY2™ WELL-MANAGED SERVER	DAY2™ WELL-MANAGED APPLICATION
Continuous cloud footprint discovery	✓	✓	✓	✓
Business context view of cloud footprint	✓	✓	✓	✓
Visualize cloud resource relationships	✓	✓	✓	✓
Single Sign-On (SSO)	✓	✓	✓	✓
Create department and application centric users	✓	✓	✓	✓
Integrate with SNS & Slack for real-time notifications	✓	✓	✓	✓
Deploy cloud infrastructure from well-architected blueprints		✓		
Build compliant cloud accounts		✓		
Reuse your existing task library		✓		
Self-service provisioning portal		✓	✓	✓
Deploy cloud application environments from well-architected blueprints				✓
Rich library of automated Cloud Ops tasks			✓	✓
Rich dashboards and reports			✓	✓
Resource level monitoring			✓	✓
Resource grouping			✓	✓
Manage Tags			✓	✓
Reuse your existing blueprints			✓	✓
Deploy operations-ready servers			✓	
Control server states, schedule up/down time			✓	
One-click remote server access			✓	
Patch compliance and reporting			✓	
VM Snapshots			✓	
Server Compliance & Desired Server State			✓	
Server Monitoring			✓	

## AWS NATIVE INTEGRATION

MontyCloud DAY2™ is integrated natively with AWS resources and leverages management tools such as AWS Cloud Formation and AWS Systems Manager to operate. You no longer have to deploy 3<sup>rd</sup> party agents or write code to achieve operations excellence.

Empower IT to become  
Cloud powerhouses
